
1. Audit and shared splits (III-A)
PRDECT-ID / SmSA; Kamus Alay fixed first
Group original / normalized equivalents
Freeze train / validation / test splits
2. Paired input conditions (III-B)
Original (O)
Minimal cleanup
Normalized (N)
Cleanup + substitution
3. Train and select models (III-C)
Word SVM / Character SVM / IndoBERT
Train each model separately under O and N
Select using validation macro-F1
Freeze models before test evaluation
4. Pipelines (III-D)
N/N versus O/O
Macro-F1 differences
Paired intervals
5. Input switches (III-E)
O/O to O/N; N/N to N/O
Macro-F1 changes
Corrections and errors
